

Decentralized Identity for All

Own your identity. Manage your reputation. Control your data

PROBLEM

We have different identities in a lot of different platforms

Password management

Medium

FOR ORGANIZATIONS

Limited information sharing

Prevent collaboration, interoperability and efficiency

Single point of failure: vulnerable to attack

FOR USERS

Many physical documents: ID, driver licence, etc.

Repetitive account creation

Inconvenience of managing multiple passwords

Outdated information in various organizations

IDENTITY WITH BLOCKCHAIN X BLOCKCHAIN IDENTITY

Managing multiple passwords

Unique persistent identity

SOLUTION

Self-sovereign identity

User stores his identity on the device

You Share with whomever you wish

No relying on a central repository

SELF-SOVEREIGN IDENTITY PLATFORM

Identity and personal data held by the user

Claims and declarations can be issued and verified

Users selectively allow permission to access data

Data only need to be checked once

DECENTRALIZED IDENTITY SYSTEM

- 1. Smartphone generates keys, maps to contract
- 2. Blockchain: provides trust
- 3. Entities issue credentials to users

DIFFERENT EXCHANGES

Binance Nível 3

Bitfinex Nível 2

Bittrex Nível 3

HitBTC Nível 2

Huobi Nível 3

No need to verify your trader level all over again in a different exchange

INTRODUCING UPORT

Log in without passwords (your identity on the Ethereum network)

You decide which information to share

Confidence built revealing only needed data

Unique identity in the Ethereum network

No use for password, single session start

Keys are held by the user, stored on the smartphone

App on iOS & Android

ETHEREUM USER-FRIENDLY

Log in on Ethereum dapps with your smartphone

You can create a unique profile with multiple data

Store credentials, declarations, verifications

WHAT IS AN UPORT IDENTITY?

Permanent identity on the Ethereum network

Smart contract controls your identity

Collection of credentials acquired through day-to-day interactions

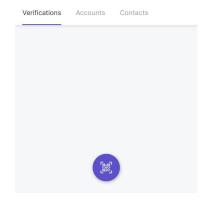

Verified user data or claims that belong to the user

Represents your reputation

ACCOUNT RECOVERY

Your account is currently at risk. Please back up your seed phrase to ensure that you can recover your account in the event of a lost or compromised device.

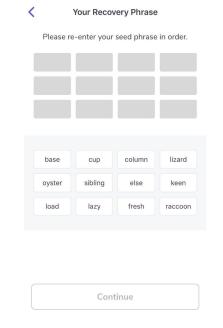

I understand that I am responsible for keeping my seed phrase private and safe. Losing my seed phrase will result in an inability to recover my account.

This is your personal Recovery Phrase. This phrase protects your identity, so keep it safe and private. We recommend physically writing it down and storing copies in different locations.

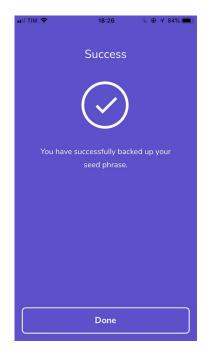

Copy To Clipboard

Setup Seed Recovery

Confirm Seed

INTELLIGENT LOGIN FLOW

1. User:

- Ok, I want to log in.

2. uPort:

 Do you have an account for this app? If not, let me create one for you (single sign-on).

3. User:

I already have one. Here it is.

WHO USES UPORT?

End-users

Developers

DApps

Exchanges

Private companies

Government (Switzerland, Brazil)

DEVELOPERS POINT OF VIEW

Valid driver license?

User over 18?

Valid certificate?

Reputation: Uber, Airbnb, Ebay...

USE CASE

https://goo.gl/ST6TnK

City of Zug, Switzerland

Self registration using uPort

Your decentralized identity is verified by the system accessing the local certification authority (CA)

Access to governmental services

Verifications tab: "Zug Digital ID verification"

USE CASE

http://bit.ly/2Y8QA8L

Ministry of Planning, Brazil

MVC

Verification of documents registered in a notary's office

DOCS
